EDUCATION

PAMANTASAN NG LUNGSOD NG VALENZUELA (PLV)

Bachelor of Science in Information Technology

Valenzuela City
Expected June 2027

SUMMARY

Highly adaptable IT generalist with a proven ability to pivot seamlessly across the entire software development life cycle. Experience spans project management, comprehensive system architecture, responsive frontend engineering, and quality assurance. Thrives in dynamic environments, stepping into critical roles to drive complex digital platforms from initial requirements gathering to final deployment.

UNIVERSITY PROJECTS

Valenzuela City Smart Feedback System: An Automated ARTA-Compliant Survey Platform - *Project Manager* 2025

- An automated, ARTA compliant survey platform featuring an offline first architecture designed to guarantee uninterrupted data collection for citizen evaluation of public services.
- Managed the end to end product delivery, bridging the gap between stakeholder compliance needs and functional technical execution.
- Directed a seven person development team to build a scalable hybrid client server application using Flutter, Node.js, and MongoDB for seamless deployment across Android, Windows, and web environments.
- Facilitated software quality evaluations based on ISO 25010 standards, leveraging technical feedback from IT experts to prioritize UI enhancements, database optimizations, and overall performance improvements.

Heavenly Cafe - *Front End Developer* 2025

- A responsive web application designed to elevate the digital storefront of a local cafe, providing customers with an accessible online menu, photo galleries, and promotional updates.
- Developed a clean, visually appealing front end architecture using HTML and CSS, ensuring a seamless and responsive user experience across all core site pages.
- Programmed dynamic UI features, including interactive menus, promotional banners, and photo galleries, using modular JavaScript to drive user engagement and site interactivity.

CertiGo - *Quality Assurance Tester* 2025

- A digital platform that modernizes local community services for Barangay Balangkas by enabling residents to request indigency certificates online.
- Conducted manual UI/UX testing to ensure an intuitive and seamless user experience across the Certigo platform.
- Leveraged AI tools to accelerate the development and maintenance of an automated testing suite, utilizing Jest for JavaScript unit testing and Playwright for real-browser end-to-end testing of critical user flows.

Mathpulse AI - *Quality Assurance and Documentation Lead* 2026

- A predictive recommender system designed to identify at-risk mathematics students across all Senior High School strands for General Tiburcio De Leon National High School and deliver data-driven, personalized learning interventions.
- Designed comprehensive system architecture (DFD, UML via Mermaid.js and Draw.io) and executed rigorous manual and automated QA testing for an advanced platform.
- Directed technical stakeholder consultations and schedule tracking via WBS, Gantt charts, and Critical Path Methods, alongside the management of all academic compliance forms and strict project manuscript formatting.

Tech Stack

Frontend (HTML, CSS, JavaScript, React, Figma), Backend (Python, Java, Node.js), Databases (MySQL, MSSQL), QA Testing (Jest, Playwright), Infrastructure (Draw.io, Mermaid.js, Cisco), Dev Tools (VS Code, Git, GitHub, GitHub Desktop, PyCharm, Android Studio), Deployment (Vercel), Collaboration (Atlassian, Jira, Confluence, ClickUp, Microsoft Teams).
